

ISDH HSP Medical Nutrition Therapy Service Standard

HRSA Service Definition:

Medical Nutrition Therapy includes:

- Nutrition assessment and screening
- Dietary/nutritional evaluation
- Food and/or nutritional supplements per medical provider's recommendation
- Nutrition education and/or counseling

These activities can be provided in individual and/or group settings and outside of HIV Outpatient/Ambulatory Health Services.

Program Guidance:

- All activities performed under this service category must be pursuant to a medical provider's referral and based on a nutritional plan developed by the registered dietitian or other licensed nutrition professional.
- Activities not provided by a registered/licensed dietitian should be considered Psychosocial Support Services under the HRSA RWHAP.
- Provision of nutritional supplements not ordered by a physician or resulting from a registered dietitian's assessment should be considered Food Bank/Home Delivered Meals.

Key Services Components and Activities:

Key services components and activities are noted in the Service Standards below.

HSP Service Standards:

Standard	Documentation
